关于我们
ABOUT US

我司专注于淋浴房研发与生产，公司创立于2000年，成立以来，一直保持高速发展。目前已和全国上百个大、中城市建立合作关系，产品远销亚洲、欧美等地。公司致力于打造全球范围的淋浴房品牌、秉承“以人为本、质量为本、服务为本，精益求精、服务至上”的经营理念，融合自信、乐观、积极向上的精神，不断创新进取，以优质的产品质量及完善的服务位受广大客户的推崇。公司吸纳了一批具有创意的研发人才加盟，同时重金聘请德国卫浴设计大师担任技术顾问。多年来创造十几项设计专利，现开发的款式结构简明、品味优雅，经济实用是现代家庭、酒店装饰的首选产品。选择我司的产品意味着选择了优质的产品及满意的服务。愿与您携手并进共创辉煌业绩。

Our company is focus on the designing and producing of glass showers with fast development since foundation at 2000.
And we have business with hundreds of partnership from many big or middle scale cities.Also we are aiming to be a worldwide brand in glass shower field
Together with designer from Germany ,We also have enrolled many skilled designer with creative idea from china .And we obtained over ten design patents
Our main clients are from wholesalers ,distributors , contractors ,builders.
Here is our greatest desire to cooperate with you to a bright future .

品牌理念
BRAND CONCEPT

企业精神
敬业精神和认真地工作态度
企业与员工、经销商共同成长，共享机遇与挑战。

企业价值
员工是企业的宝贵财富，经销商是企业的重要资源，关心员工的成长，为员工创造良好的发展机会；关注经销商的利益，为经销商提供丰厚的盈利回报；视员工和经销商为企业不可或缺的重要组成部分，走企业与员工、经销商共同发展之路。

企业宗旨
顾客永远第一
永远走在顾客前面，永远高于顾客需求，不惜一切为客户服务，为客户创造利润为己任，并在此基础上密切与经销商之间的共赢合作。

社会价值
劳动成果属于社会
注重社会公益事业，企业创造丰硕成果，为奉献回报社会奠定基础，最终以劳动成果回报社会。

Company Spirit
Developing together with our workers, clients and sharing opportunities and challenge

Company Value
Customers always in the first place .

Corporate purpose
Customers always come first.
Always in front of customers, always higher than customer demand, at all costs for customer service, to create profits for customers, and on this basis close win-win cooperation with dealers.

Social Responsibilities
Pay more attention to social utilities.

淋浴房选材用材标准

Shower Room Selection Standard

滑轮 / Roller

专注滑轮的品质，承载能力强、顺畅、V形轨道与滑轮配合、静音、使用寿命长。从材质上保证滑轮承载与寿命；轴承选用440顶级轴承钢，硬度可达58HRC，防水设计结合与淋浴房滑轨的人性化设计，保证滑轮的顺畅与静音。

Focus on the quality, bearing abilities, smoothy, Less noisy, Matching with V sliders with Long lifetime. We using 440 Top bearing steel with 58HRC hardness.

五金配件 / Hardwares

五金配件大多采用铜材与304不锈钢材质，凡是淋浴房上的五金件，哪怕是一个小螺钉，为了防止生锈、腐蚀、老化等，都要经过严格的抗腐能力测试——盐雾试验。五金件都要达到48小时中性盐雾测试10级，重要部件甚至达到96小时，一个小小螺丝的生锈可能导致一套淋浴房的松动和使用隐患。

We using Brass and #304 Stainless steel hardwares

磁条、胶条 / Magnetic Strip and Rubber block

淋浴房的一个最重要的作用就是防水，起到卫生间干湿分离的效果，究竟这种效果如何，最终的细节处理就是磁条和胶条。既要保证整个产品通透简洁，又要严格合缝设计产品的水密性。淋浴房磁条、胶条选用行业最顶级优质防水材料，不变质、不变色、不消磁、无异味，可通过权威检测，24小时耐黄变试验和抗老化测试。

We select the best top materials and past 24 hrs test to different from dry and wet area.

玻璃 / Glass

淋浴房产品在玻璃选材上注重安全、环保、通透、易洁等标准。
※淋浴房通过国家3C认证并达到欧洲标准。
※汽车级钢化玻璃。（一般厂家采用建筑级普通钢化玻璃）
※由保险公司承保。（保险承保是由保险公司鉴定后来实现的）
※采用信义原片，保证玻璃通透洁，玻璃的价格差就在原片上。（普通原片有杂质、气泡、易自爆、不通透、难清洁）
※采用德国玻璃深加工设计，玻璃完全由全电脑控制的生产线，玻璃孔位、缺口、边角易爆裂的地方全部采用先进的水切割无棱角技术，保证工艺完全。
Passed 3C and European Standard, easy to clean and other standards.
※Tempered Glass with same level in the Car glass.
※Passed insurance company standard and bought insurance.
※Use Xinyi original film to ensure the transparency and cleanliness of glass. And easy to clean.
※German products skills are adopted. The glass production line is completely controlled by computer.
※Advanced water cutting technology without edges and corners is used in all the places where glass holes, jackets and edges are easy to burst, so as to ensure the complete process.

铝合金框架 / Aluminum Frame

铝合金框架材质注重硬度、抗腐蚀性、承载能力。
淋浴房选用行业高标准6463铝材，硬度达到12-14，具有良好的抗腐蚀性、韧性，表面阳极氧化处理后色泽靓丽，一般采用铝材壁厚1.0-3.5mm，保证材质承载能力。
6463 aluminium material with hardness of 12-14. It has good corrosion resistance and toughness.
The surface of the shower room is bright after anodizing treatment.
The wall thickness of aluminium material is generally 1.0-3.5mm to ensure the material carrying capacity.

不锈钢框架 / Stainless Steel Frame

淋浴房中高端产品均选用不锈钢框架，不锈钢因其光亮、不易生锈、易清洁、深受消费者喜欢，选用304不锈钢材质，表面经过多层深加工处理，表面亮度达精抛8K镜面效果，从而使其表面更光洁，不易落脏、避免生锈、易清洁，选用主材厚度1.0-1.5mm。
304 stainless steel material is selected. After multi-layer deep processing, the surface brightness reaches 8K mirror effect, which makes its surface more smooth, dirty, rust avoidance and easy cleaning. The thickness of main material is 1.0-1.5mm.

淋浴房执行标准

Shower Room Standard of Execution

304不锈钢 / #304 Stainless Steel

采用304不锈钢，耐腐蚀、抗疲劳、承重力强。每一个产品独立开模制造配件，使所有的配件之间的配合精度最大限度的精化。304 stainless steel, corrosion resistance, fatigue resistance, strong bearing capacity. Each product independently opens the mold to manufacture the accessories, so that the coordination precision between all the accessories can be refined to the greatest extent.

纳米技术 / Nanotechnology

德国纳米易洁玻璃表面处理技术，使淋浴房玻璃易清洁、耐腐蚀。German nanometer easy-cleaning glass surface treatment technology was adopted to make glass easy to clean and corrosion-resistant

防爆性能 / Explosion-proof performance

汽车级玻璃防爆膜，有效增强玻璃的抗冲击能力和安全性。Automobile grade glass explosion-proof film can effectively enhance the impact resistance and safety of glass

活动门启闭试验 / Opening and closing test of movable door

活动门经过三十万次启闭测试，使用寿命长达20年。After 300,000 opening and closing tests, the lifetime is up to 20 years

新型材料 / New materials

领驭未来的新型材料，开启淋浴房设计新纪元，实用与美观兼具。Lead the future of new materials, open a new era of shower room design, practical and beautiful

环保材料 / Environmental protection materials

提倡环保、关注未来，各种组件及包装材料均采用环保材料制作。All kinds of components and packaging materials are made of environmental protection materials.

全钢化玻璃 / Tempered glass

国家钢化玻璃检测标准，破碎后在5x5cm单位面积内颗粒数为42~50粒以上，高于国家标准。Passed the national testing standard, the number of particles per unit area of 5X5 cm after crushing is over 42-50, which is higher than the national standard.

胶条耐温 / Temperature Resistance of Adhesive Strip

胶条采用可耐60度高温，-40度低温的起透环保材料制作，耐高温，抗老化。The adhesive tape is made of environmental protection material which can withstand high temperature of 60 degrees and low temperature of - 40 degrees. Temperature resistant and ageing resistant.

完全防水系统 / Waterproof system

精细设计、关注细节，构建完全防水系统，真正做到干湿分离。Fine design, attention to details, construction of a complete waterproof system, really achieve the separation of wet and dry.

滑轮静音性 / Roller noisy control

滑轮采用超静音的特殊材料制成，运行平稳、无噪音。The roller is made of special material with super silence, which runs smoothly and has no noise.

连动技术 / Linkage Technology

双受力、无积水、防晃动的暗藏滑轮式专利连动技术，确保移门安全、稳定、顺滑。Double-force, no water accumulation, anti-sloshing hidden pulley patent linkage technology to ensure the safety, stability and smoothness of the sliding door.

淋浴房尺寸测量标准

Shower Room Size Measurement Standard

目的：规范测量程序，提高测量效率及尺寸的准确性。
注意：现场尺寸的测量，需在卫生间瓷砖贴完之后再测量尺寸。
工具：卷尺、量角器、角度尺、铅笔、笔记本等。
长度单位：mm

如有顶拉杆的，测量淋浴房的高度时要考虑拉杆高度，参考图册选择的是带拉杆型号，需下单时注明房高度是到拉杆顶部高度还是到玻璃的高度。

- 特别提示：
1、所测尺寸以实际测量为准，不能随意增加或减少尺寸；
2、所测尺寸均为底座最外延尺寸，下单以底座最外延尺寸报单；
3、所测尺寸必须注明石基的顶宽；

其他注意事项：
1、咨询客户水电线路图，确保安装之处的水管、电路通过；
2、所测尺寸，必须是实际尺寸（不能增减）；
3、提供卫生间简易布局图（拍照）；
4、淋浴房开门方向及周边是否有碰撞；
5、确定房体方向（左、右型）；
6、如果是高楼层的，需留意卫生间门和电梯的尺寸，确保货品能顺利入户；

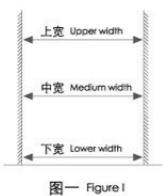

一字形屏风测量方法(石基的宽度必填)

Sliding Screen Measurement Method (The Width of Marble Must Be Filled)

[如图一所示，测量尺寸，做好三个尺寸的记录并和客户确认好高度。]

As shown in Fig. 1, measure the dimensions, record the three dimensions and confirm the height with the customer.

L：下宽 Lower width
L1：中宽 Medium width
L2：上宽 Upper width

图一 Figure I

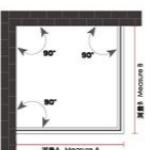

方形淋浴房测量方法(石基的宽度必填)

Measuring method of square shower room (width of stone foundation must be filled)

[如图二所示测量出A、B尺寸，[墙到石基最外延尺寸]；做好记录即可。]

注意：如两墙角不是垂直90°，会出现两种情况：

- [Fig. 2] Measure the dimensions of A and B [the most epitaxy dimension from the wall to the stone foundation] as shown in figure 2; just make a good record.
Note: If the two corners are not vertical 90 degrees, there will be two cases:
1. 如果墙角大于90°，做出来的订制门就会偏小；
2. 如果墙角小于90°，做出来的订制门就会偏大；
1. If the corner is greater than 90 degrees, the customized door will be smaller.
2. If the corner is less than 90 degrees, the customized door will be larger.

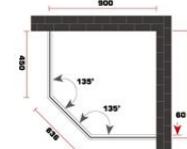

图二 Figure II

钻石型底座测量方法

Measuring method of diamond tray with

标配钻石底座尺寸：

Standard diamond tray size:

标配：900x900石基
Standard: 900 x 900 stone base

预埋非标配钻石型石基测量方法

Measuring Method of Embedded Non-standard Diamond Marble

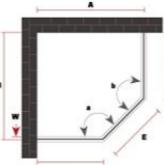

左型(长≠宽) C>D反知右型，判定方法(如图三)：配公司底座，只需报长x高尺寸客户预埋，尺寸需要准确测量出{如图四} A、B、C、D、E、W(石条宽度)，用量角器测量出两个夹角的具体度数和a、b的具体角度；

(C=A-0.707E D=B-0.707E)判断方法

Left type (length width) C > D anti-right type. Judgment method (fig. 3): matching company base, only need report length x width x high-size customer pre-embedded, size needs to accurately measure (fig. 4) A, B, C, D, E, W (strip width), measuring the specific degree of two angles and the specific angle of a, b with a dosimeter;
(C=A-0.707E D=B-0.707E) Judgment Method

图三 Figure III

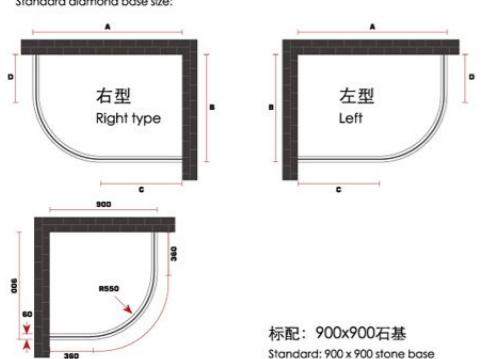

图四 Figure IV

预埋非标准扇形石基测量方法(石基的宽度必填)

Pre-embedded non-standard fan-shaped marble measurement method (the width of rock marble must be filled)

标配钻石底座尺寸：

Standard diamond base size:

标配：900x900石基
Standard: 900 x 900 stone base

预埋非标准扇型石基测量方法

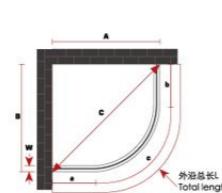

Pre-embedded Non-standard Fan-shaped Rock Foundation Measurement Method

所需测量具体尺寸如下(如图五)

- A、B、C、总长L、石基宽W具体测量方法：
1、测量abc三个尺寸，然后相加求总和得出总长L；
2、C尺寸测量方法：用绳子靠墙角拉到弧边外延求出距离，然后用卷尺测出绳子长度，得出C长度。
3、做好记录画好草图，并拍照；

The specific dimensions of the measurements required are as follows (Fig. 5):
Specific measurement methods of A, B, C, total length L and width W of rock foundation:

- Measure the three dimensions of abc, and sum them up to get the total length L;
- Measuring method of C dimension: calculating the distance by pulling the rope to the arc edge by the corner of the wall, and then measuring the length of the rope by tape measure to get the length of C.
- Make a good record; draw a sketch and take photos.

图五 Figure V

淋浴房尺寸测量标准

Shower Room Size Measurement Standard

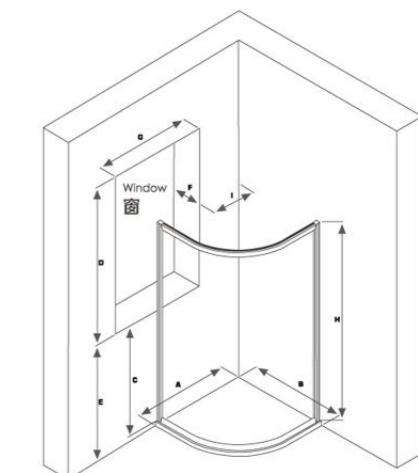

带窗户尺寸测量方法

Measuring Method of Size with Window

测量现场遇到安装位置带窗户的情况时，已预埋石基要测量石基上表面到窗台的距离C，没预埋石基的，测量地面到窗台的高度E，如需在窗台上安装转角副窗，还需测量出D、F、G、I具体尺寸。

When measuring the location of the installation site with windows, the distance C from the upper surface of the stone foundation to the windowsill should be measured. If no stone foundation is embedded, the height E from the ground to the windowsill should be measured. If angular auxiliary windows need to be installed on the windowsill, the specific dimensions of D, F, G and I should also be measured.

位置 Position	尺寸(mm) Size(mm)	详细描述 Detailed description
A		墙到石基的外沿长度 Exterior Length of Wall to Marble
B		墙到石基的外沿宽度 Exterior Width of Wall to Rock Foundation
C		石基表面到窗户的尺寸 Size of stone base surface to window
D		窗台高度尺寸 Size of windowsill height
F		窗台宽度尺寸 Size of window sill width
G		地面到窗台尺寸 Ground to windowsill dimensions
I		墙面到窗台尺寸 Size from wall to windowsill
H		产品预订制高度 Product Reservation Height

带腰线或水管的尺寸测量方法

Dimension Measurement Method of Waist Line or Water Pipe

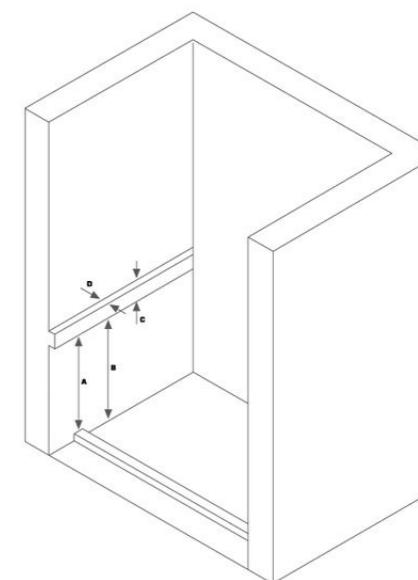

1、安装位置有凸台或水管的情况时，已预埋石基的需要测量石基上表面到凸台的高度A，没预埋石基，需测量地面到凸台的高度B，再测出凸台或水管的具体尺寸C、D；

2、对所测尺寸做好记录，画好草图，拍下照片；

1. When there is a convex platform or water pipe in the installation position, it is necessary to measure the height A from the upper surface of the stone foundation to the convex platform, but not the embedding of the stone foundation. It is necessary to measure the height B from the ground to the convex platform, and then measure the specific dimensions C and D of the convex platform or water pipe.

2. Record the measured dimensions, draw sketches and take photos.

位置 Position	尺寸(mm) Size(mm)	详细描述 Detailed description
A		石基表面到凸台下尺寸 Dimensions from the surface of the stone foundation
B		地面到凸台下尺寸 Dimensions from floor to bench
C		凸台高度尺寸 Height dimension of convex platform
D		凸台厚度尺寸 Thickness Dimension of Convex

淋浴房计价原则

Pricing Principle of Shower Room

1. 淋浴房计价原则一般以面积*单价*折扣计价，具体的面积计算方法见面积计算公式表

2. 玻璃工艺变化或是型材颜色变化，拉手变更等计价原则：

更换玻璃工艺：是以(普通玻璃价格+工艺单价)*面积*折扣

更换型材颜色：是以(普通标配单价+型材颜色差价)*面积*折扣

更换拉手：是以标配单价*面积*折扣+拉手差价*折扣

3. 凡是在定制范围内尺寸变化非标，都不产生非标加价。凡是在定制范围以外，需增加其他辅助配件来保证其产品的质量，需非标加价，具体加价以确认图纸为准；

4. 凡是最低面积没达到该型号的最低起订量的非标，统一以非标起订面计价；

5. 房体需开缺，或玻璃需开缺，或是因墙地原因为增加其他辅助零配件来保证产品质量的，需非标加价，具体加价以确认图纸为准。

1. Pricing principle of shower room is generally based on area * unit price * discount. Specific area calculation method can be seen in the table of area calculation formula.

2. Valuation principles such as glass process change or profile color change, hand-in-hand change, etc. Replacement Glass Technology: With (Ordinary Glass Price + Process Unit Price) * Area * Discount

Replacement of Profile Colors: Discount on Area * Based on (Ordinary Standard Unit Price + Profile Color Difference)

Replacement of Handles: Price per Unit * Area * Discount + Handle Differential * Discount

3. Any non-standard dimension change in the customized scope will not result in non-standard price increase. In addition to the customized scope, other auxiliary parts should be added to ensure the quality of their products. The non-standard price increase should be required, and the specific price increase should be based on the confirmation of drawings.

4. Where the minimum area fails to meet the minimum order quantity of the model, the non-standard area shall be uniformly priced.

5. If the housing needs to be opened, or glass needs to be opened, or other auxiliary spare parts need to be added to ensure product quality due to site reasons, a non-standard price increase shall be required, and the specific price increase shall be based on the confirmation of the drawings.

五金铸件

HARDWARE

五金配件精细打造

Fine Building of Hardware Fittings

原材料到开模、浇铸、毛坯、成形、打磨、抛光、成品！

中间也经过多道化学程序，才能把一个五金配件做到成品。

这样才可以确保产品的品质更卓越！

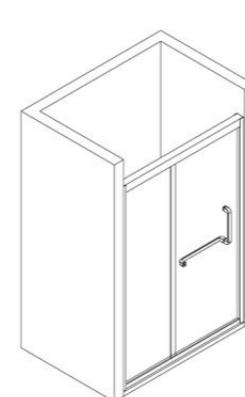

Raw materials to die opening, casting, blank, forming, grinding, polishing, finished products!
In the middle, it also passes through a number of chemical procedures, so that a hardware fittings
can be finished.
Only in this way can we ensure that the quality of products is more excellent!

In the field of fashion, find your own personality, in every detail of life, let you enjoy the "bath" as you like.

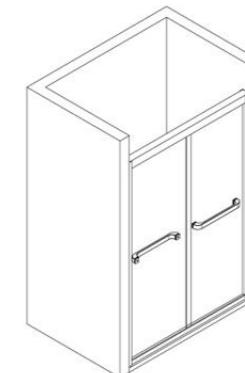

在时尚的领域，找到属于自己的个性，在每一个生活细节里，让您畅享随心所“浴”。

轮静音特殊设计

- 滑轮采用进口定制改性工程塑料
- 轮与轨道配全更紧密
- 滑动平稳、静音

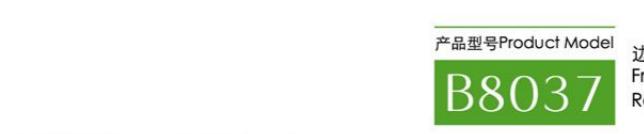

偏心调节功能设计

- 采用偏心螺母
- 调节方便
- 使用简单、顺滑舒适

采用高精级滑轮

- 25分贝轴承+定制改性工程塑料
- 承重好、超顺滑
- 静音、耐用

防松螺母

- 采用防松螺母固定
- 保证挂体螺丝不退不松
- 持续使用无售后之忧

The mood does not lie in pros and cons, but in adjustment. Good mood brings good mood, bad mood brings bad mood, it is the environment that affects the mood.

心情不在于顺逆，在于调整。好心态带来好心情，坏心态带来坏心情，影响心态的，是环境。

- 主材均采用镜面SUS304不锈钢，豪华大方，极具质感，承重力强可做大尺寸；
- 采用SUS304不锈钢精铸滑轮，耐磨静音，使用寿命长；
- 底挂轮采用防摆轮设计，稳定性强，推拉平稳顺畅；
- 联动式开门，三块玻璃重叠一起，使得开门空间瞬间增大；

- Main materials are polish SUS304 stainless steel, luxurious and generous, very textural, strong bearing gravity can be large size;
- SUS304 stainless steel cast pulley, wear-resistant silent, long service life;
- Bottom sprocket is designed with anti-swing wheel, which has strong stability and smooth push-pull.
- linkage type open door, three pieces of glass overlap together, making the opening space increase instantaneously;
